- Thousands of youth leagues

Life Span of MRSA

- 7 months on dust
- 56 days on a mop head
- 203 days on a blanket
- 9 weeks on cotton

The Center for Disease Control (CDC) states 25-30% of the population carries staph bacteria. 1% carries MRSA. In close contact risk groups such as athletics, the military, etc., MRSA can be as high as 5-6%.

The CDC has called MRSA the “**cockroach of bacteria.**”

You have an opportunity to bring a important service to **your** community. You can help control this pathogen risk. Would **your** family ever think of not washing their clothes or only washing them 1 or 2 times per year. Why would we treat our equipment with any less attention than we wash our clothes. Good hygiene is becoming a must for all things that come in contact with us.

Your market is large and untapped. For less than \$14,000, you can reach these untapped markets shown at left. Talk with us and let us show you how to reach these markets. The **Sports-O-Zone Sanitizing System** gives you the versatility to meet the sanitation needs of your community. Versatility can mean your own mobile service, behind the counter profit center, and/or stand alone vending applications.
